***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to the multi-purpose dental tool, classified in class 433, subclass 31.
- II. Claim 16, drawn to the method for measuring the depth of penetration of a root canal file, classified in class 433, subclass 224.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the multi-purpose dental tool can be used in materially different processes. As stated in the specification: "It is to be understood, therefore, that the invention may be practiced otherwise than as specifically set forth herein" (page 10 lines 17-18). For instance, the dental tool could also be used to measure desired lengths of cuttings tools, such as files or reamers, or to measure lengths of wire.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3732

4. A telephone call was made to Mr. Royal Craig on 9/28/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
